

20.17 **Oil Shale – a Scientific-Technical Journal Published in Estonia**

Meelika Nõmme

Estonian Academy Publishers, Journal Oil Shale, Tallinn, Estonia

Oil Shale (Goryuchie Slantsy) was founded in 1984 as a joint scientific-technical journal of the Academies of Sciences of the former USSR and Estonian SSR. Oil Shale is concerned with geology, mining, genesis, composition, methods of processing and combustion, economics and utilization of oil shale and bituminous sands, as well as with problems of environment protection. Oil Shale is the only journal in the world specialized in oil shale problems. In 1990, the Editorial Board started to reorganize the previous journal having been written mainly in Russian into an international one with the purpose to join the scientists dealing with oil shale research all over the world and to present the achievements of Estonian specialists. Oil Shale, the journal of the Estonian Academy of Sciences, is administered by the Estonian Academy Publishers from January 1999 and runs on a non-profit basis. Journal Oil Shale is indexed in the Science Citation Index® and in the following ISI® products:

- SciSearch®
- ISI Alerting® Services
- Current Contents®/Engineering, Computing, and Technology

Journal Oil Shale is also linked: to the Estonian Internet directory Estonia - Wide Web and to the StudySphere®
